EMERGENCY DEPARTMENT PHYSICIAN RECORD

Patient: Marisol Vega **DOB:** 07/19/1988

Date of service: 02/03/2026 **Arrival:** 14:32 **MRN:** BRM-4471902

Attending physician: Daniel Okafor, MD

Chief complaint

Neck pain and low back pain after a motor vehicle collision.

History of present illness

37-year-old female, restrained driver, rear-ended at a stop light at moderate speed about one hour before arrival. Airbags did not deploy. Reports immediate neck stiffness and low back pain, pain 7/10. Denies loss of consciousness, numbness or weakness.

Examination

Tenderness over the cervical paraspinal muscles and the lumbar paraspinal muscles. Range of motion of the neck reduced by pain. Strength 5/5 in all extremities. Sensation intact.

Imaging

CT head without contrast: no acute intracranial abnormality.
X-ray cervical spine, 3 views: no fracture or malalignment.

Treatment in the department

Ketorolac 30 mg IM given at 15:10. Pain improved to 5/10.

Diagnoses

1. S13.4XXA - Sprain of ligaments of cervical spine, initial encounter
2. S33.5XXA - Sprain of ligaments of lumbar spine, initial encounter
